	<ul style="list-style-type: none"> • The Child Health Advisory Committee recommends a scientifically sound, evidence and assessment based, sequential curriculum be used for K-12 physical education <i>pending the availability of free options.</i> • The Child Health Advisory Committee recommends a scientifically sound, evidence and assessment based, sequential curriculum be used for K-12 nutrition education <i>pending the availability of free options.</i> • The Child Health Advisory Committee recommends professional development be required as follows for: <ul style="list-style-type: none"> ○ a. Elementary classroom teachers certified in physical education should receive professional development of 6 hours for physical education and nutrition education with no less than 3 hours in nutrition education; ○ b. Licensed elementary classroom teachers who are not content certified in physical education but teach physical education are to take an additional 3 hours of physical education content; and ○ c. Secondary physical education and nutrition education teachers should receive no less than 6 hours of professional development in physical education and nutrition education with no less than 3 hours in nutrition education.
2019	<ul style="list-style-type: none"> • The Child Health Advisory Committee recommends schools provide resources and education that connect chronic disease, including obesity, to adverse childhood experiences (ACEs) for students and staff. • The Child Health Advisory Committee recommends the Division of Elementary and Secondary Education of the Arkansas Department of Education (ADE) provide professional development on ACEs for school staff to include, but not limited to, how to teach students and how to identify individuals with signs and symptoms of ACEs. • The Child Health Advisory Committee recommends school districts employ, contract, or partner with provider organizations to enable access to services of a Registered Dietitian/Licensed Dietitian (RD/LD) to provide Intensive behavioral therapy (IBT) for students and staff experiencing obesity. Arkansas public schools should be deemed as a Medicaid provider of nutrition counseling services necessary to prevent and treat obesity and be eligible to seek reimbursement. <i>Will discuss further with larger pilot additional data regarding current practices and expectations.</i> • The Child Health Advisory Committee recommends Out of School Time (OST) programs on school campuses align with the nutrition and physical activity standards set forth for public school students during the school day and

	<p>school personnel engage their community OST organizations to promote the adoption of similar standards as a part of their daily program. <i>Will discuss further with additional data regarding current practices and expectations.</i></p> <ul style="list-style-type: none">• The Child Health Advisory Committee recommends that the Division of Elementary and Secondary Education of the Arkansas Department of Education facilitates the development and fielding of a parent engagement survey to gather information from schools and parents as to how to best communicate and engage with parents regarding child health and wellness, inclusive of nutrition, physical activity, and mental health. <i>This is a recommendation only.</i>• The Child Health Advisory Committee recommends that the Division of Elementary and Secondary Education of the Arkansas Department of Education provides standard guidance and resources for schools, parent teacher organizations, and community groups to facilitate parent engagement through social media and targeted in-person events. The guidance should be developed in collaboration with the Arkansas Department of Health to also include ways in which schools have/could partner with state and local medical and mental health professionals to engage with student/parents/teachers in an event/presentation about child and family wellness. Logistical considerations include staffing, funding, and timing in context of school year calendar and other communications and events. <i>This is a recommendation only.</i>• The Child Health Advisory Committee recommends collecting information regarding the following of physical education (PE) best practices at each school with the results included in My School Info. School administrators will be given a list of PE best practices and would check off their school’s participation, or lack of participation, for each specified best practice at the individual building level; this information would be collected for reporting purposes only. The list should include the following questions at a minimum: a. Is there a content certified teacher for PE? b. Is there a written sequential curriculum? c. Are there continuing education hours in content area yearly for PE (6 hours)? d. Are there opportunities for inclusion during PE and physical activities for children with disabilities. <i>Will discuss further with additional data regarding current practices and expectations.</i>
